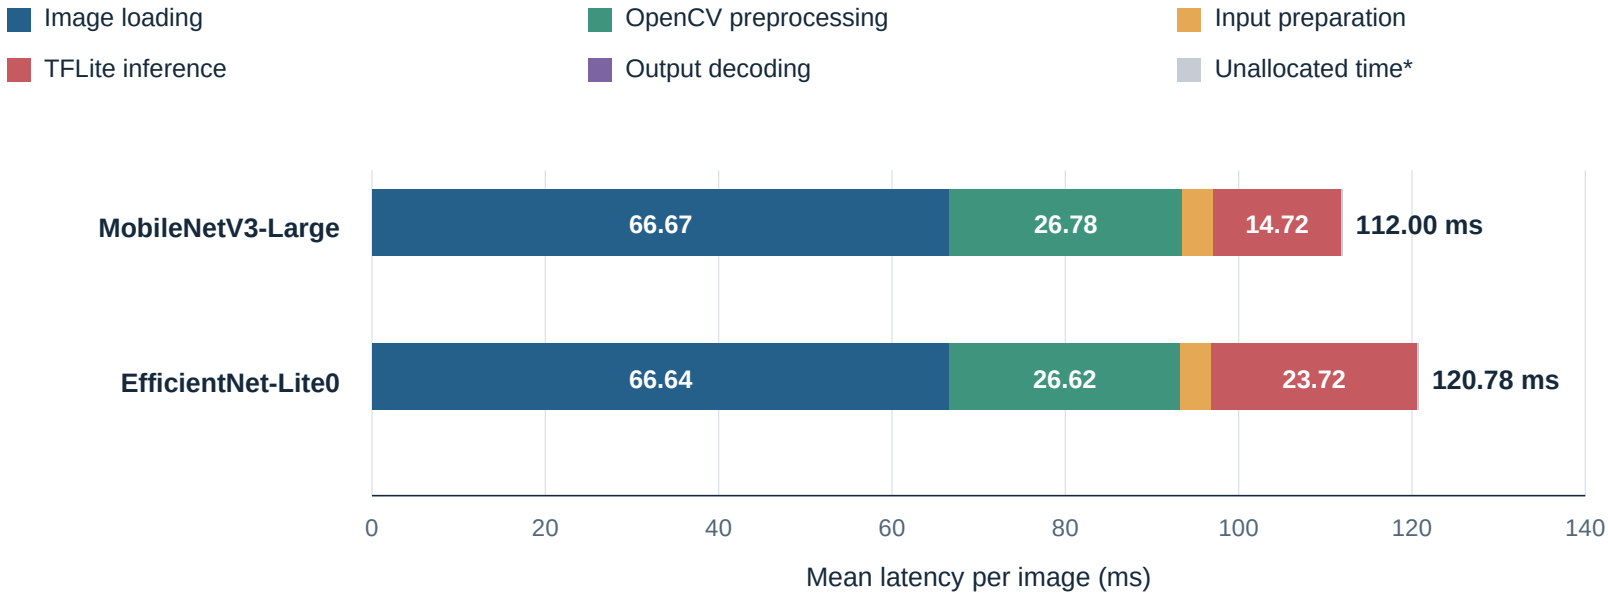
Android latency composition

Same 100 APTOS images (20 per grade) | Huawei DBR-W00 | Android 12 | 4 threads + XNNPACK



Loading + preprocessing: 83.45% of total time for MobileNetV3-Large; 77.21% for EfficientNet-Lite0.

*Unallocated time = measured total minus the five recorded components (0.14 / 0.15 ms).

Input preparation: 3.63 / 3.61 ms; output decoding: 0.04 / 0.04 ms (MobileNetV3-Large / EfficientNet-Lite0).
